Abstract. Abstract should have 200 words at maximum.

1 Introduction

2 Objectives

3 Related Work

In this section the suggestion is to make a timeline to relate the evolution of cloud provisioning in IoT applications.

Relate the progress achieved since the first cloud-based approach until TOSCA.

- Cloud Computing, REST and Mashups to Simplify RFID Application Development and Deployment
- Cloud of Things
- Enabling the Cloud of Things
- Efficient and scalable IoT service delivery on the cloud
- TOSCA
- Combining Declarative and Imperative Cloud Application Provisioning based on TOSCA

4 Solution Architecture

5 Evaluation

6 Conclusion
